

Denis Craciun

Back-End Developer

Profile

Back-End Developer always looking forward to improving. Strong attention to detail, and no problem working under pressure. Easy going when in collaborative environment while still focused on archiving high-quality results. Fast learner passionate about logic, maths, physics, algorithms, problem solving and the web in any kind of form since young. Eager to prove my skills and help to develop any kind of project in the best and fastest way with clean code and organised working environments. Experience tutoring Python, JavaScript and C++, both to university and college students.

Native in English, Italian and Romanian.

Projects

- **eCommerce selling hand made products**
Developed with NodeJS and the Stripe API for the payments gateway. Designed in Figma and currently online at <https://handmadeandrushka.com/>
- **Dijkstra's algorithm visualisation**
Developed in JavaScript currently online on my website and available on my GitHub
- **Social network development: ElbaShare**
Developed with Flutter and currently on the PlayStore and on my GitHub, this is a social network I made for the place I live: Elba Island.
- **Realistic Physics Simulation**
Developed with Python and the Pymunk and Pygame modules, it is currently available on my website and the code is visible on my GitHub page.

Feel free to check out my website for more of my work!
